**Firerock Fireplaces by Masonry Art, LLC**

We can build it! Brick by brick or a Firerock Fireplace System. We collaborate with local specialty companies to ensure a first class fireplace installation. From the footing to custom screens and gas logs, we work with the best.

## A perfect Masonry Fireplace!

### What is Firerock?

Fire Rock products utilize volcanic pumice and calcium aluminates cements to form refractory components that reflect heat back in to the home.

Fire Rock Products install in a fraction of the time it takes to build a masonry fireplace from concrete or brick. The components are designed to insure proper draw on every firebox. Once installed, a Fire Rock fireplace can be covered in a wide variety of veneers. The system is American Made, patented and tested to UL Standards.

### Why we like the Firerock System

In addition to the Firerock System, we are also a professional masonry subcontractor. Our experience in the commercial and residential masonry field ranges from large box projects and schools to upscale custom residential projects. Masonry Art takes great pride in knowing that our projects will likely look as good or better in 100 years. In working with the Firerock product, we feel confident that the Firerock product will last for generations.
